

The Durham Engineers Club Cordially invites you to our  
February 9, 2012 Meeting

Featuring our guest speaker Peter D'Adamo, PH.D., P.E  
The topic is ....

**"Emerging Contaminants in Water Supplies -  
Their Prevalence and Treatment Options"**

**[Register Now!](#)**

**Where:**

Croasdaile Country Club  
3800 Farm Gate Avenue  
Durham, NC 27705

[Driving Directions](#)

**When:**

Thursday February 9, 2012 from  
6:30 PM to 8:30 PM EST

[Add to my calendar](#)

**Dear Fellow Professional:**

**Please consider our special invitation to attend our regular monthly meeting Thursday, February 9th from 6:30 to 8:30 pm. This presentation will be made by Peter D'Adamo, PH.D., P.E who is a Vice President of HDR Engineering Inc., of the Carolinas**

Endocrine disrupters, pharmaceuticals/personal care products and other microconstituents are groups of emerging contaminants that have been detected at trace concentrations in waters around the US. Their presence has become a cause for concern in the public arena. These contaminants encompass a vast range of molecular structure and chemical properties and therefore strategies to remove these compounds in our drinking water supplies can be varied and complex. Much of the recent and current research is focused on their prevalence and potential impacts to the environment and human health. Limited data, however, exists on the occurrence and fate of these emerging contaminants during the water treatment process. This presentation will review some of the contaminants of concern, their prevalence in our water supplies and environment, and their fate in the water treatment process. The effectiveness of different types of water treatment processes to remove or alter these compounds will also be discussed. .

Dr. D'Adamo has over 34 years of experience as an environmental engineer and scientist. His focus has primarily on water treatment optimization and design and has worked on projects ranging in size from 1 MGD to over 300 MGD. His educational background includes a BS degree in Biology from Loyola College, a Masters degree in Environmental Engineering from the University of Delaware and a Doctorate from Johns Hopkins University. In addition to serving as HDR's water business class lead in the Carolinas, Dr. D'Adamo serves as HDR's East Coast Technical Lead.

Please click on the link below to register; the cost to attend is \$25 for members and \$35 for non-members and this is collected at the event via cash or check. We and the Club cannot accept credit cards for this event.

The price includes a buffet dinner at the Croasdaile Country Club. The buffet features an extensive salad bar, and a variety of hot dishes; the food is excellent. Social hour is from 6:30 to 7:00 pm and there is a cash bar. Dinner is from 7:00 to 7:30 and the webinar will begin at 7:30 and the presentation will be about an hour.

**One (1) PDH will be provided; a terrific bargain!**

Please join us for this great presentation by clicking on the "Register Now" link below, if you cannot attend please let us know as well, and feel free to forward this invitation to as many others as you would like using the button below.
