Dear Fellow Professional :

Please consider our special invitation to attend this special field trip of the Duke University West Campus Steam Plant.

Where

**Duke University West Campus
Steam Plant Project**

Corner of Research & Coal Pile
Drive
Durham, NC

[Driving Directions](#)

The tour will be given by: Floyd Williams, Office of Project Management; Chris Silcott, Duke utilities (plant manager); and Bill Seyler, Lend Lease.

"Duke's West Campus Steam Plant was built in 1929 as part of Horace Trumbauer's original plan for Duke's West Campus. In February 2009, the plant ended an 80-year tradition of coal delivery by rail car and began its step toward reducing Duke's use of coal. In April of 2011 the West Campus Plant burned its last load of coal and began utilizing natural gas. This fuel change was an important step in the execution of the Duke Climate Action Plan. With the renovation that enabled the fuel change, the West Campus Steam Plant received significant upgrades in auxiliary equipment, including the addition of a condensing economizer. This device allows for significant energy recovery and maximized plant efficiency."

Directions: Turn from Erwin Road onto Research Drive. Drive down the hill, and at the bottom turn left off of Research Drive into the steam plant driveway (just past the old Coal Pile Drive). Park in the service lot for the West Campus Steam Plant.

**2013 Corporate Golf
Tournament Sponsors**

HAZEN AND SAWYER
Environmental Engineers & Scientists

STEWART

**HORVATH
ASSOCIATES**

**THE JOHN R. McADAMS
COMPANY, INC.**
