***Parking: Enter the eastern driveway (to the right, facing the plant) and drive into the parking lot to the right of the buildings and left of the pond.***

[Driving Directions](#)

**Personal Protective Equipment will be provided.**

Gate Precast is one of the nation's largest producers of architectural precast concrete, pre-stressed hollow core slabs, and transportation/infrastructure and marine components. The company operates eight manufacturing facilities located in North Carolina, Alabama, Kentucky, Tennessee, Florida and Texas. At these state-of-the art plants, architectural and structural concrete are designed, manufactured, delivered and installed to customers in over two-thirds of the United States.

Acquired by Gate in 1995, the North Carolina facility is based on 41 acres located 40 miles north of Raleigh, NC. The 75,000 square-foot enclosed production facility has an annual capacity of 850,000 square-feet of architectural precast concrete and 1.5 million square feet of hollow core.

Gate has state-of-the art batch plant equipment and material handling. Yard storage and loading is handled by a 15-ton 150' span gantry crane and two 40-ton MiJack Travel lifts. The plant has installed custom-made precast for large military projects such as DISA (Fort Meade, MD), FORSCOM (Ft. Bragg, NC), Joint-Use Intelligence Analysis Facility JULIAF (Charlottesville, VA) and U.S. Army Medical Research Institute of Infectious Diseases USAMRIID, which is the nation's largest and most complex high-containment medical research facility. Gate Precast Company, Oxford, NC, is SHARP Certified and PCI (A1, C2) Certified.

**One (1.0) PDH will be provided. Please join us for this great event by clicking on the "Register Now" link below.** If you cannot attend please let us know as well, and feel free to forward this invitation to as many others as you would like using the button below.
