Dear Fellow Professional:

Please consider our special invitation to attend our regular monthly meeting Thursday, November 10th from 6:30 to 8:30 pm. Solid waste management is a necessary public service that continues to receive critical reviews from many different interested parties - all claiming to have their local community's best interest in mind. This presentation will address the value of recognizing different perspectives of common approaches to municipal solid waste management, how those perspectives can shape a community's approach to managing its own solid waste, and possible implications for the Triangle.
