Dear Fellow Professional :

Please consider this special invitation to attend our regular monthly meeting on Thursday, November 20, 2014 from 6:00 to 8:00 PM.

Volker Rummenhohl is President of V-Tack, LLC, a consulting company for air pollution control. He graduated as a Diplom Ingenieur in chemical engineering from the University Dortmund, Germany. The degree is equivalent to a master's degree. Volker has twenty nine years experience in the air pollution control technology specializing in the reduction of nitrogen oxides, which are precursors for smog and acid rain. He was involved in sales, engineering, commissioning and operation of Selective Catalytic Reduction (SCR) technology plants. Volker lives in Durham, NC.

The SCR technology was developed in the late seventies in Japan, transferred to Germany in the mid eighties and spread around the world from there. The technology is currently used to reduce nitrogen oxides from oil, gas and coal fired power stations, waste to energy plants, steel mills, refineries and many other industrial sources as well as diesel engines in ships
